**Modification:** 26. August 2024 (by email)  
Study Protocol V1.4 v. 26Aug24

Dear Dr. Nydahl,

We confirm receipt and acknowledgement of the amendment to the above-mentioned study. After reviewing the documents, there are no professional ethics or professional law objections to the amendment and the continuation of the study.

We would like to point out that data protection aspects of research projects are generally only cursorily examined by the Ethics Committee. This vote does not replace consultation with the responsible data protection officer.

In the case of studies carried out abroad, we generally recommend that you check whether the project complies with the relevant requirements of the home country (legal provisions, other above all special socio-cultural norms of conduct) and whether advice from the ethics committee responsible there is necessary.

Kind Regards

  
Prof. Dr. med. H. M. Menthorn  
Chairman of the Ethics Committee

  
Dr. med. Christine Glinicke  
Office of the Ethics Committee
