

WDAD Meeting

September 25th, 2023

Agenda:

Updates

Repetition of the survey

Updates

Publications are in progress

1. Paper (prevalence data, descriptive data) is under review in JAMA Neurology
2. Paper (comparison of units with/without protocols for delirium management) is under review in JAMA Neurology
3. Paper (comparison of delirium in high vs. low income leveled countries) is nearly finished
4. Paper (qualitative data) is in progress.

We have another two groups, analyzing data of German speaking countries.

Bronagh is working on a paper about delirium in pediatric ICUs, to my knowledge.

Suzanne has a paper about delirium in Ireland nearly ready

Terry is working on delirium in UK/Schottland, to my knowledge

Survey in 2024

Next WDAD in 2024

On next WDAD March 13th, we will **NOT** repeat the prevalence study, but perform delirium awareness projects. We have not decided what and how, and are open for any suggestions!

Some of us, **who could not participate in 2023**, will perform the survey in 2024 (**Brazil, Norway, Singapore, Philippines**). We will discuss and perform this in a subgroup.

This is all. Thank you for participation and networking!

We will meet again October 30th, same time
